

# JupyterLab keyboard shortcuts

Naviation	
<b>edit mode</b> to modify content	<b>Enter</b>
<b>command mode</b> to run code	<b>Escape</b>
Use <code>Esc</code> and <code>Enter</code> to toggle between command and edit mode. Notice the cell input border becomes blue in edit mode (grey in command mode).	

when in command mode	
use cursor keys to navigate	
insert cell <b>a</b> bove	<code>a</code>
insert cell <b>b</b> elow	<code>b</code>
<b>d</b> elete cell	<code>dd</code>

when in Edit mode	
<b>tab completion</b>	<code>Tab</code>
toggle <b>line comment</b>	<code>Cmd + /</code>
in parenthesis of function to <b>display docstring</b>	<code>Shift + Tab</code>

Running code, getting help	
<b>run cell</b> and put cursor below	<b>Shift + Enter</b>
run cell and stay in cell	<code>Control + Enter</code>
get help / information on object / method	<code>?name_of_object</code> (e.g. <code>"?print"</code> )
To run a cell of code, hit <code>Shift + Enter</code> . This executes the cell and puts the cursor in the next cell below (or makes a new one if you are at the end). Alternatively, you can use <code>Control + Enter</code> to execute the cell and keep the cursor in the same cell.
